

30-Ton Heated Hydraulic Press For Advanced Polymer Synthesis Solid-State Battery Research And Ceramic Densification

Item Number: XP10

Introduction

KINTEK's 30-ton heated press delivers precise high-pressure compaction with integrated water cooling, programmable temperature controls, and glovebox compatibility for solid-state electrolyte, polymer, and ceramic research. Standard (110 kg) and Pro (150 kg) configurations, with optional recirculating chiller for rapid cooling.
